#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 1-6 are objected to because of the following informalities: In claim 1, line 2 "said motor" lacks a positive antecedent basis. In claim 1, there is no structural relationship with the blades or motor and the housing or plate. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10-11 and 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuwabara et al. Kuwabara et al discloses a housing 12 having at least a translucent portion 1 (see column 5, lines 31-35) with a peripheral edge; and a plurality of LED light sources 2 mounted closely adjacent said translucent portion edge; and a plate coupled to said housing, and wherein said light sources are mounted within the openings. Whereby light emanating from the light source is directed onto the translucent portion to illuminate the housing.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuwabara et al. Kuwabara et al discloses the claimed invention except for the teaching of using incandescent bulbs for the LEDs of Kuwabara et al. It would have been obvious to one skilled in the art at the time the invention was made to substitute Incandescent lamps for the LEDs of Kuwabara et al since the examiner takers official notice that these types of low voltage amps are interchangeable in the illumination art for providing effective low voltage lighting.

***Allowable Subject Matter***

5. Claims 1-6 are allowed.

***Response to Arguments***

6. Applicant's arguments with respect to claims 10-15 have been considered but are moot in view of the new ground(s) of rejection.

In the office action filed on 06/14/2005, the examiner indicated that claims 7-9 would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Furthermore the examiner stated in his

Reasons for allowance, "none of the prior art of record alone or in combination teaches or fairly suggest **the claimed details of claim 1** further including "a plate is coupled to said housing, said plate having a series of openings; and wherein said light sources are mounted within said openings."

The applicant assumed that also adding the recitation of "a plate is coupled to said housing, said plate having a series of openings; and wherein said light sources are mounted within said openings" to independent claim 10 would further put claims 10-15 in condition for allowance. **The examiner never indicated this.** Claim 10 doesn't further include a plurality of blades coupled to said motor as claimed in claim 1.

### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2875

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
